ABOUT THE ELECTRIC BLANKET

With the blanket, you can gently warm and relax your whole body. Using the blanket stimulates the circulation in areas of tense muscle and promotes a sense of well being after a strenuous day. The blanket provides a pleasantly warm bed, allowing you to relax and get to sleep quickly.

Spread the blanket out flat on top of the mattress. Four fastening straps are located on the corners of the blanket. Use these straps to attach the blanket to the mattress using a suitable band or cord. Make sure that the blanket is firmly strapped to the mattress in both directions and that it will not crease while it is being used. Spread a bedsheets on top of it. This allows the blanket to release its heat in the best way possible. Check it is in the correct position before going to bed!

The blanket can only be used when it is spread out flat. The blanket features an electric temperature control that regulates the temperature according to the chosen setting.

OPERATION

It is recommended that the blanket to be switched on (in position 3) 30 minutes before going to bed.

Plug the blanket into the mains outlet and turn the selector switch on the controller from position 0 to position 1. The red power indicator will light up. You will feel the blanket gradually warming up. This will be even more noticeable if it is covered with a quilt. If you require a higher temperature setting, turn the switch to the position 2 or to position 3. Should the blanket get too warm for you, turn the switch back to position 2 or to position 1. Position 2 and 3 of the blanket is intended for heating up, only position 1 is for continuous operation. Move the selector switch to position 1 before falling asleep.

To switch off the blanket, turn the switch to position 0. The red power indicator will go off, indicating that the unit is switched off. Now unplug the blanket from the mains outlet.

CLEANING AND MAINTENANCE

- Before cleaning the blanket, unplug it from the mains outlet and let it cool down completely or for at least ten minutes.
- The blanket is equipped with a detachable cable. Disconnect the plug and remove the cable from the blanket.
- You may wash the blanket gently by hand. The best way to do this is to put the blanket in a bath with lukewarm water and some mild detergent and then gently squeeze it out.
- Do not use hair dryer to dry this product, have to dry naturally, stretch the blanket out on a flat surface.
- Rinse the blanket several times to remove all the detergent.
- Store the blanket in a clean and dry place, laid out flat with nothing covering or resting on top of it.
- Only use the blanket once it is completely dry.
- You may also wash the blanket in a washing machine at a maximum temperature of 30°C with low mechanical action and spin. It's advisable to wash it by hand in order to prolong the life of the product.
